

REVERSE BRAKE & CLUTCH BLEEDER

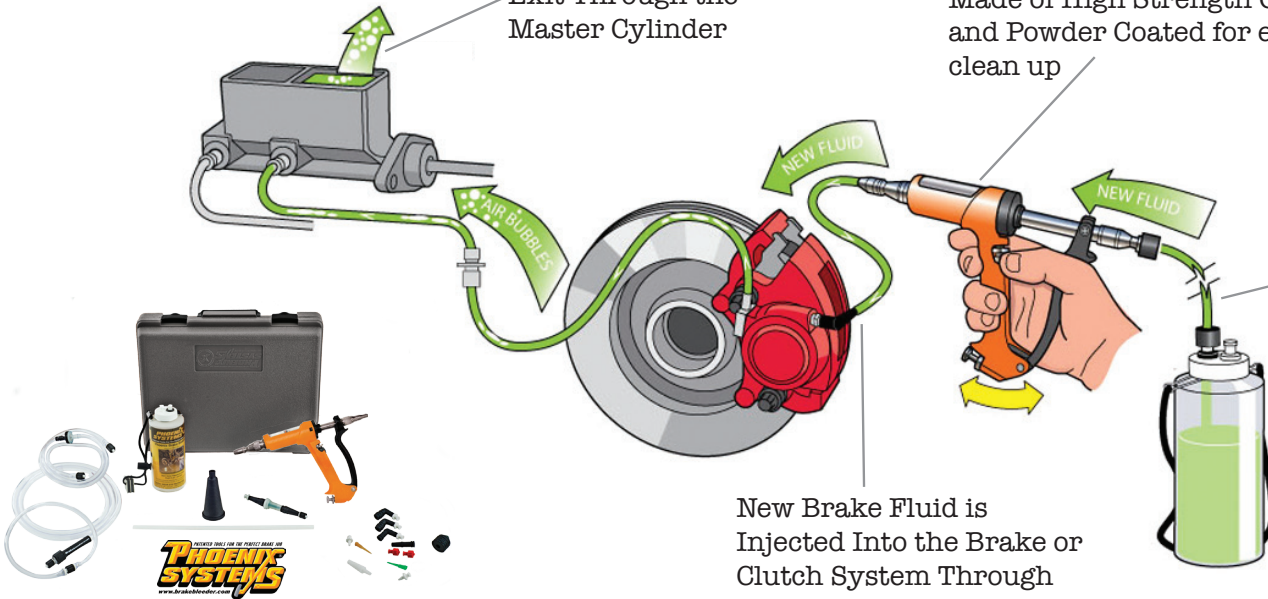

(Phoenix Systems) **NEW! MaxProHD** Will Bleed Any Hydraulic System

Air Bubble's Rise and Exit Through the Master Cylinder

MaxProHD Phoenix Bleeder is Made of High Strength Cast Steel and Powder Coated for easy clean up

New Brake Fluid is Drawn in every time the Bleeder Handle is Released

New Brake Fluid is Injected Into the Brake or Clutch System Through the Bleed Screw.

"This product worked so well. I am going to recommend it to everyone I know. Once you understand how to use it. (It comes with a great tutorial DVD and written instructions w/diagrams.) It took me less than five minutes to bleed my clutch hydraulic system. I don't know how I got along all these years without it." -**Roger M (Leesville, LA)**
