

# Phoenix Systems Sends Winner on Trip to Meet Larry McReynolds for All-Star Race

*Phoenix Systems announces the winner of the 2015 Win Race Tickets Facebook Giveaway. The winner will head to the Charlotte Motor Speedway on May 16 for the All-Star Race.*

St. George, UT (PRWEB) April 8, 2015 -- Yesterday Phoenix Systems, makers of several patented products including BrakeShot, BrakeStrip, and Reverse Brake & Clutch Bleeders, announced the winner of their 2015 "Win Race Tickets Facebook Giveaway". Suzanne Cleary Drews from Edgewater, Florida, is this year's Grand Prize winner. Phoenix Systems will be sending her and a guest on a trip to Charlotte Motor Speedway for the May 16 All-Star Race, including a one-on-one meeting with Larry McReynolds.

With this year's Giveaway, which started in January, Phoenix Systems has also offered monthly, weekly and daily prizes. Each month, Phoenix Systems has given away a MaxPro HD Reverse Brake Bleeder or a V12 Reverse Brake Bleeder. Weekly giveaway winners received a V5 Reverse Brake Bleeder. Every day, one daily winner was given a Phoenix Systems t-shirt, and at random times Phoenix Systems would draw a winner for a signed Larry Mac die-cast Daytona 500 Anniversary addition model car.

"We are thrilled for the opportunity to give one of our loyal customers the trip of a lifetime," said Ben Martinsen VP of Marketing and Operations for Phoenix Systems. "Ms. Drews will be able to enjoy the race at the Speedway and spend some time with Mr. McReynolds, the crew chief with the most wins in history, all while having her travel, hotel accommodations and dining covered."

The deadline for the giveaway was March 31, and the Grand Prize winner was announced April 7. Phoenix Systems offered the giveaway as a way to thank the company's valued customers while also raising awareness of some of the brand's products.

## **About Phoenix Systems**

Phoenix Systems is the makers of BrakeStrip, a brake fluid testing strip; BrakeShot, a brake fluid enhancer; as well as a selection of reverse brake bleeding and brake fluid testing products. These products use the latest technology to ensure that vehicles are driving, and stopping, as safely as possible, and provide automotive repair companies with the products they need to advise their customers with confidence about braking safety issues. For more information about BrakeStrip and other Phoenix System products, visit [www.brakebleeder.com/products](http://www.brakebleeder.com/products).
