

S&E Distributors now distributing the new Coolant + Brake Fluid Test Strips

In a new agreement, S&E Distributors has agreed to begin distributing the Coolant + Brake Fluid Test Strips available from Phoenix Systems. These test strips allow shops to test both coolant and brake fluid quickly and affordably when servicing customer vehicles.

St. George, UT (PRWEB) December 23, 2015 -- S&E Distributors will be offering a new product to their customers in 2016 with the addition of Phoenix Systems' Coolant + Brake Fluid Test Strips, an innovative product that provides a cost-effective way for shops to test these important fluids and provide customers with better service. Through the distribution agreement, S&E Distributors will be offering the test strips to its quick lube and auto repair companies throughout the United States.

Through the agreement S&E will be offering its customers Coolant + Brake Fluid Test Strips, a double-ended test strip that tests both coolant and brake fluid to determine if they need to be replaced. The strips provide automotive technicians with visual evidence of the quality of the fluid, increasing authority and customer service for them as they educate customers about the need for replacement.

This is not the first time S&E has taken on a Phoenix System product. S& E has partnered with Phoenix System to distribute its products since November of 2012. This year it will add the Coolant + Brake Fluid Test Strips to continue in its goal of providing quality products and superior customer service to its customers.

"We are thrilled to offer Coolant + Brake Fluid Test Strips to S&E Distributors and their customers," said a Phoenix Systems spokesperson. "S&E has such a great reputation in the automotive service industry, and adding our newest product to their lineup will be a great fit."

The S&E team also expressed excitement over the distribution partnership. "Our customers have loved the other Phoenix Systems products we have offered, especially the Brake Strip testing strips," said Sean Malmstrom of S&E. "Now, the newest test strips offer one strip that will test both coolant and brake fluid, saving time and money for the shops that come to us for products. We feel that our customers will appreciate this new product, as it will help their bottom lines and their customer service."
